

Hexaware

“Hexaware empowers enterprises with an expedited path to integrated cloud consulting on AWS.”

Ashwin Gaidhani

Overview

Hexaware is headquartered in Mumbai, India and operates in 19 countries. It has more than 28,500 employees across 54 global offices. In FY22 the company generated \$1.2 billion in revenue, with Financial Services as its largest segment. Hexaware is an AWS Premier Consulting Partner with more than 4,000 cloud professionals. Its AWS services provide customers with a complete cloud journey roadmap and offer consulting across different industries, including financial services, healthcare and life sciences, retail and insurance.

Strengths

Cloud path to value: Hexaware helps clients to strategically navigate the complexities of determining the optimal path to the cloud and selecting the most impactful migration process. Its Amaze® automated cloud migration and management platform provides invaluable guidance as enterprises undertake a transformative journey.

Holistic solutions for application and database migration: Hexaware delivers a holistic solution to application and database migration, enabling enterprises to benefit from accelerated, secure and cost-effective transitions to the cloud. This enables clients to take their first move to the cloud and benefit from reduced IT infrastructure costs.

Data-integrative AWS consulting:

Hexaware specializes in devising successful application and data modernization strategies for the cloud as a de facto prerequisite for enterprises striving to remain competitive while delivering agile and cost-effective customer services. For example, adopting open-source, lightweight and cloud-native platforms such as Postgres within Amazon Relational Database Service (Amazon RDS) or Amazon Aurora can decrease the TCO.

Caution

Hexaware can elevate the market positioning of its Amaze® framework by tapping into the extensive AWS marketplace and innovation ecosystem. The company can achieve this by showcasing client success stories and promoting best practices.
